Hello, I'm Giovanni Guillen!

I am a technology enthusiast with more than 20 years working in backend development and project management for the banking industry. As a software developer, I enjoy turning complex problems into simple ones to improve business processes. I have experience developing software on IBM AS/400 and Windows. As a technical project manager, I like to manage software development projects in the banking industry, applying PMI best practices and agile methodologies, with proven success in increasing revenue, market share, and profits, achieving cost reductions, managing successful projects, and its alignment with corporate strategies.

EXPERIENCE

- 2018 - Current

**Software Developer**  
Scotiabank-Colpatría

Gathering and analyze user requirements to convert them into software requisites and analyzed current software architectures, designed, and developed software to integrate Core Leasing with digital channels and other systems.
- 2017 - 2018

**Senior Software Developer**  
AOS SAS

Technical leader of the project to develop reports of Bancompartir in the framework of the implementation of IBS Core Banking.
- 2012 - 2017

**Module Leader**  
TATA Consultancy Services.

I managed demand, planning, and prioritization of software development projects. I controlled scope, scheduling, resource allocation, and risks. I guided the design and development of solutions tailored to customer requirements and standards, identifying, and developing common components, and coordinating their reuse in any project. I set goals, monitor performance, and provided appropriate feedback to team members..
