Hello, I'm Giovanny Guillen!

I am a technology enthusiast with over 20 years working in software development and project management. As a technical project manager, I like to manage software development projects, applying PMI best practices and agile methodologies, with proven success in increasing revenue, market share, and profits, achieving cost reductions, managing successful projects, and their alignment with corporate strategies. As a software developer, I enjoy turning complex problems into simple ones to improve business processes. I have experience managing and developing software on IBM AS / 400 and Windows platforms oriented to the integration and digital transformation of the business.
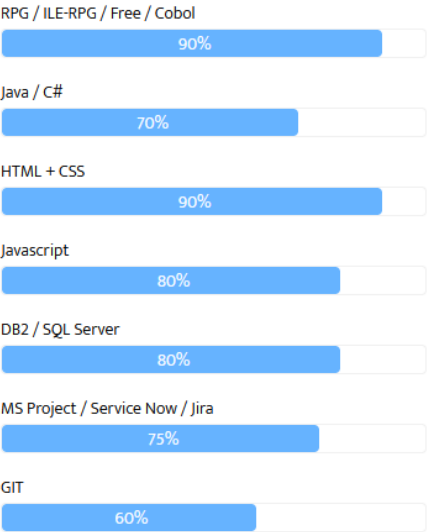

EXPERIENCE

- **2018 - Current**

  IT Project Manager

  ITStragys: Scotiabank-Colpatria

  Manage the project of updating and digital transformation of the Leasing system, improving the user experience. Management of the budget, schedule, and resources. Management in the collection and analysis of user requirements to convert them into software requirements. Technical support in the analysis of current software architectures, design and software development to integrate Core Leasing with digital channels and other systems.

- **2017 - 2018**

  Senior Software Developer

  AOS SAS: Bacompartir

  Technical leader of the Bancomarca reporting project within the framework of the implementation of IBS Core Banking. Manage requirements, design, and software development. Resource management.

- **2012 - 2017**

  Module Leader

  TATA Consultancy Services: Citibank

  Manage demand, planning, and prioritization of software development projects. Control scope, scheduling, resource allocation, and risks. Support in the design and development of solutions tailored to the client's requirements and standards, identifying and developing common components, and coordinating their reuse in any project. I set goals, monitored performance, and provided appropriate feedback to team members.
